# Reliable and Easy-to-Use MFPs for Simply Better Business

Sharp's advanced full-colour MX-6050V/5050V does wonders for your workflow. Beyond just fast output speeds, it offers advanced functionality and supports easy and secure information sharing. With stress-free operation in Easy UI mode, this MFP makes short work of every task. In your high-tempo workplace, the MX-6050V/5050V is the ideal productive addition.

## Simply Better Process

Transform the way you use information in your business by connecting one of these new MFPs to a variety of mobile devices and cloud services. Now you don't have to be confined to the office—you and your team can work anytime, anywhere. The amazing flexibility of these Sharp MFPs can help you grab new business opportunities and boost your bottom line.

### Link to Public Cloud and Mobile Printing Services\*

These MFPs enable single sign-on for easy access to public cloud services such as Google Drive™, OneDrive® for Business, SharePoint® Online, and Box. They also support mobile printing services such as Google Cloud Print™, AirPrint, and Sharp Print Service Plugin.

\* For details, see pages 5 and 6.

### Office Direct Printing\*

Print common Microsoft® Office files without using a PC. With a MX-6050V/5050V, you can print a Word, Excel®, or PowerPoint® file directly from a mobile device, cloud service, USB drive, or file server.

\* Requires optional MX-PU10. The actual printout may look different from what is displayed on the computer screen. This function is enabled via DirectOffice™ technology.

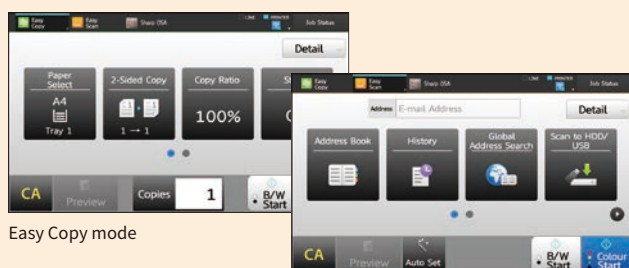

Office users

## Simply Better Experience

Sharp's proprietary technologies give each of these MFPs quick warm-up and first copy times. Thanks to their intuitive operation, quick recovery from standby, and superb usability, the MX-6050V/5050V simplifies even the most complex work processes and help you finish document jobs fast.

### Easy User Interface

The intuitive Easy UI mode makes it easy for anyone to use the MFP's advanced functions. In this mode, simple function icons are displayed on the 10.1-inch colour LCD touchscreen. Each user can customise the home screen by drag-and-dropping icons for commonly used functions, making for smoother, more efficient operation.

Easy Copy mode

Easy Scan mode

### Fast Wake Up from Sleep Mode

These MFPs recover quickly from energy-saving Sleep mode. Placing a document in the RSPF or touching the LCD control panel wakes the MFP up in just one second\*. This helps to minimise waiting time and get your jobs done faster.

\* When in Fast Wake Up mode.

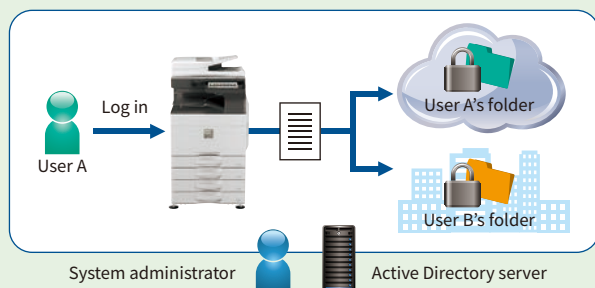

IT managers / administrators

## Simply Better Admin

These MFPs fit securely and seamlessly into your office system. An advanced security environment and new, easily viewable administration tools reduce the workload for system administrators and give full support to their management duties.

### Secure Access Control

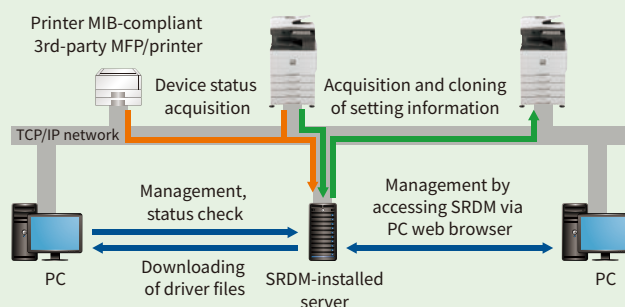

The MX-6050V/5050V supports the **Active Directory®** service, which lets you use the machine's log-on credentials for network folders. With centralized management of multiple user credentials, system administrators are able to keep track of MFP usage, which makes for an efficient and highly secure operational environment. And with **single sign-on**, you can access cloud services and internal network folders from the MX-6050V/5050V by simply logging in to the MFP—there's no need to re-enter your IDs and passwords.

### Integrated Device Management

As a system administrator, you can get the most out of a Sharp document system by using Sharp's efficiency-boosting device management tools. From a single location, you can use Sharp Remote Device Manager\* (SRDM) to manage multiple Sharp MFPs. This includes everything from system setup, user access, and security settings to troubleshooting and maintenance.

\* Contact a Sharp customer representative for availability and other details.

# HIGH PRODUCTIVITY

## Super-Efficient Colour and B/W Output

The MX-6050V/5050V delivers a fast output of 60/50 ppm\* in B/W and in full colour. The first copy comes out in just 3.7 seconds in B/W and 4.8 seconds in full colour, saving you valuable time when performing multiple short-run jobs.

\* A4 (8 1/2" x 11"), long-edge feeding

## Intermediate Toner Hopper for Continuous Runs

Thanks to an intermediate toner hopper, there's no need to stop the MX-6050V/5050V during large-volume copy/print jobs when the toner cartridge needs changing. The MX-6050V/5050V can use toner from the toner hopper to continue printing while the empty toner cartridge is replaced with a new one.

## Versatile Paper Handling

Maximum paper capacity on the MX-6050V/5050V is 6,300 sheets. Most of the paper trays accommodate a wide variety of paper, in sizes up to SRA3 and in weights up to 300 g/m<sup>2</sup>. These MFPs can also handle extra-long paper up to 1,300 mm\*. In addition to plain paper, the MFPs accommodate a number of other paper types, including coated, textured, embossed, and removable adhesive paper. Such versatile paper handling expands the range of possible printing applications.

\* Sharp recommends using the optional MX-LT10 for this function. Contact a Sharp customer representative for details.

## Job Separator Tray

The Job Separator Tray option prevents copy/print/fax jobs from getting mixed together. Thanks to this interior output tray system, the MFP can provide up to four output destinations when it's equipped with an exit tray and external finisher.

## Finisher Options

These MFPs offer plenty of finishing options to suit a variety of workplaces and applications.

## Stapleless Stapler

To make paper recycling easy and to save on stapler costs, a staple-free stapler crimps the corners of paper to keep up to five sheets securely bound.

## Manual Stapler

You can quickly staple documents at the MFP as needed without using a conventional stapler. A real time-saver if you want to, say, restaple documents that were unstapled for copying.

## Print Release\*

The Print Release function lets you send documents to the main MFP, which acts as a server and stores them for printing out from any other compatible MFP on the network. This function comes in handy when the main MFP is in use or under maintenance, letting you finish your job with minimal waiting.

\* There is a limit to the maximum number of connectable MFPs. Contact a Sharp customer representative for details.

## High-Efficiency Scanning

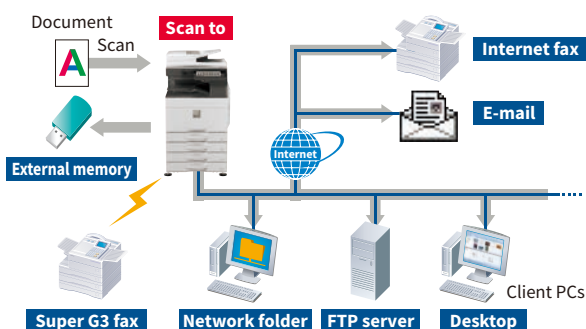

The MX-6050V/5050V's standard-equipped 100-sheet RSPF (reversing single pass feeder) efficiently feeds in either one- or two-sided originals. With a scanning speed of up to 80 opm\* (one-sided) for both colour and B/W documents, the MX-6050V/5050V can complete large jobs with ease and efficiency.

\* Originals per minute; when feeding A4 (8 1/2" x 11") sheets

## Multiple Distribution of Scanned Files

Scanned documents can be distributed in a number of ways. For example, they can be sent as e-mail attachments or they can be scanned directly to an FTP server for storage. When you're scanning large-volume documents, the MFP saves the data on its hard disk and generates a URL for accessing that data. You can then e-mail recipients this URL rather than the full document, thereby reducing the load on the mail server.

## Multicrop Function

The Multicrop function automatically creates separate files for multiple different-sized documents—such as receipts and bills—that are scanned simultaneously.

## Image Crop Function

This function lets you scan multiple photos all at once and save each one as a separate file. It can also crop photos on documents such as magazine pages and save them as individual files.

### Scan multiple photos

### Crop photos from magazine page

## Compact PDF\*

Converting scanned documents into compact PDF files helps to reduce network traffic and make more efficient use of disk and cloud storage.

\* Requires optional MX-EB11.

## Address Book

The address book has an easy-to-see layout that includes Frequent Use buttons, a separate Address list, and larger buttons, scroll bar, and text. This user-friendly design makes selecting the right scan/fax destinations more effortless than ever.

## Versatile Fax Functions (option)

- **Super G3 Fax** function
- **Internet Fax** lets you exchange faxes via e-mail
- **PC-Fax** sends PC documents directly to a fax machine via a phone line

# SECURE INFORMATION SHARING

## Link to Cloud Services\*<sup>1</sup>

An MX-6050V/5050V doesn't just connect to your local server. It also connects with cloud services directly from the MFP's control panel. You can upload scanned data to Google Drive, OneDrive for Business, SharePoint Online, or Box\*<sup>2</sup>—or print directly from any of them\*<sup>3</sup>. Using a cloud service like this can save you the time and cost of setting up and managing a server within your company. Once you log in to the MFP, its single sign-on feature allows you to quickly access multiple software services without having to sign in to each one separately. It's a true time-saver that gets your document jobs finished faster.

\*1: Requires optional MX-AMX2.

\*2: Contact a Sharp customer representative for details.

\*3: Direct printing of PDF files requires optional MX-PK13; direct printing of Microsoft Office (pptx,xlsx, docx) files requires optional MX-PU10.

## Link with Mail Servers

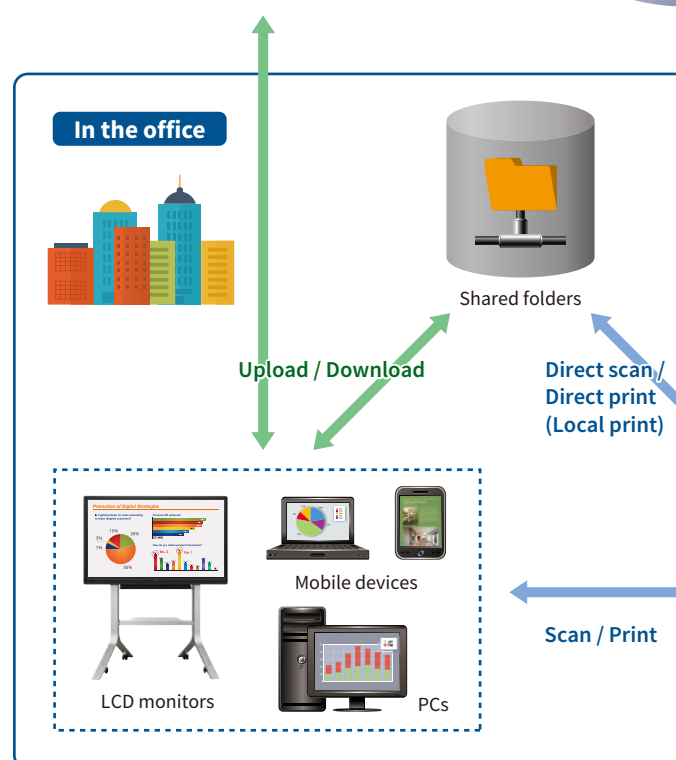

Scanned data can be conveniently sent via your regular Gmail™ or Microsoft Exchange/Online account. Sending e-mail is as easy as choosing a recipient from your address book on the mail server. Scanned data that you send can be stored on the mail server with other sent items.

## Sharp OSA\* (Open Systems Architecture)

Innovative Sharp OSA technology allows you to interact with critical business and network applications right from the LCD control panel, offering a new realm of control and convenience. And since Sharp OSA utilises industry-standard network protocols, the MX-6050V/5050V can easily integrate with document management systems, enterprise resource planning software, workflow applications, and more. The latest version of Sharp OSA can reach beyond the firewall, enabling extensive system construction as well as services delivered over the Internet such as cloud services.

In this way, Sharp OSA provides a foundation for cost reductions and information sharing across the entire company organisation—effectively enhancing total business efficiency.

\* Requires optional MX-AMX2 and/or MX-AMX3.

## Seamless Document Management

### Sharpdesk Document Management Software

Sharpdesk provides integrated desktop management of documents in over 200 file formats, including scanned paper-based documents and those created with popular applications such as Word. It allows you to organise, edit, search, and distribute your documents, all with simple drag-and-drop operation. Features include thumbnail viewing, annotation tools for paper-free proofreading, optical character recognition, full text search, and more.

### Easy Sharing of Application Files

The MX-6050V/5050V's hard disk enables files created with applications such as Word and Excel to be saved in their original file format and shared across the office network.

Note: Sharp recommends backing up data saved to the MFP's hard disk.

### Document Filing

Document Filing allows files that have been copied, printed, scanned, or faxed\* to be stored by job in a Quick File folder, Main folder, or Custom folder on the MFP's hard disk. From there, they can be instantly recalled for printing and sending at a later time. The Main folder and Custom folder require users to enter a password for access, thereby protecting your sensitive data.

\* For fax and Internet fax jobs, only transmitted data (not received faxes) can be saved via the Document Filing function.

## Two-Way Sharing with Mobile Devices

Connecting an MX-6050V/5050V to one or more mobile devices is easy, and it expands your options for sharing data. Not only can you send scanned documents to mobile devices such as smartphones and tablets, you can also print documents or photos sent from those devices.

### Sharpdesk Mobile\*<sup>1</sup>

Sharpdesk Mobile is a mobile print/scan app that connects the MFP to mobile devices via wireless LAN. You can easily link your mobile device to the MFP by simply holding it over the MFP's NFC card reader\*<sup>2</sup> or by scanning the MFP's QR Code®.

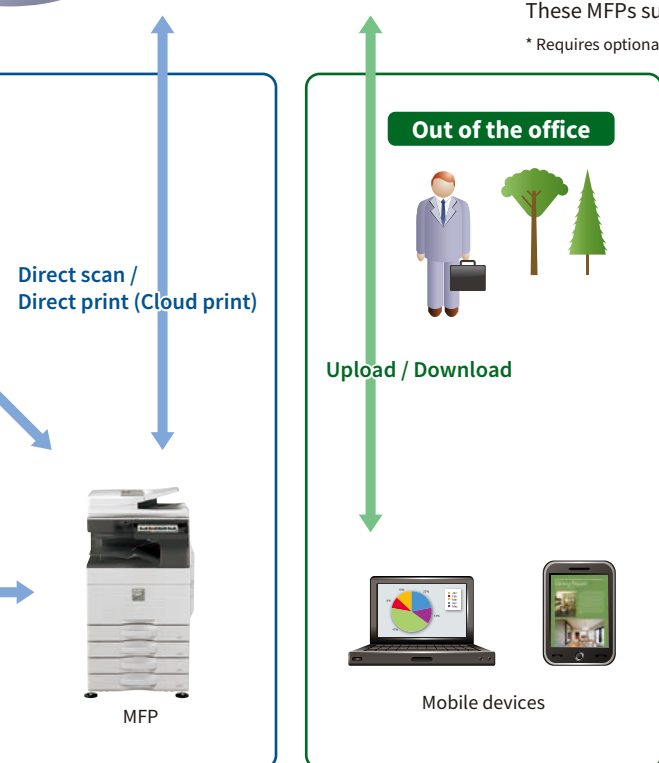

\*1: Availability varies by country/region. For details, see the Sharpdesk Mobile support website: [http://sharp-world.com/products/copier/docu\\_solutions/mobile/sharpdesk\\_mobile/](http://sharp-world.com/products/copier/docu_solutions/mobile/sharpdesk_mobile/)

\*2: The NFC interface is for Android™ devices. Requires commercially available NFC card reader. Contact a Sharp customer representative for details.

### Mobile Printing Services\*

These MFPs support Google Cloud Print, AirPrint, and Sharp Print Service Plugin.

\* Requires optional MX-PK13.

## Wireless Connections\*

These MFPs offer ultra-handry wireless access via two easy modes, enabling convenient access to the MFP even from places where a wired LAN is not available.

\* Requires optional MX-EB18. Availability of this option varies by country/region.

**Infrastructure mode** wirelessly connects the MFP to mobile PCs/devices via a commercially available wireless LAN router.

**Access point mode** wirelessly connects a LAN-wired MFP to mobile PCs/devices without going through a wireless LAN router.

Note: External networks cannot be accessed via the MFP. Up to five mobile devices can be wirelessly connected to the MFP at the same time.

## Multi-Layered Security

### Document Protection

- **Document Control** prevents unauthorised use of confidential documents by embedding copy prevention data in them

Note: Requires optional Data Security Kit. May not work with certain types of paper, documents (such as those with a large volume of photos), or MFP settings.

- **Hidden Pattern Copy/Print** embeds a watermark, such as "Confidential" or "Not for Copy," onto a document
- **Tracking Information Print** prints the MFP user's name, the date, job ID, and other specifics on printouts

### Data Protection

- Job data is automatically **encrypted** before being saved to the MFP's internal storage. Once a job is finished, its encrypted data is **erased** by up to 10 automatic overwrites.

Note: Contact a Sharp customer representative for details on activating this function.

- Retained data can be **initialised** when it's time to replace the MFP, preventing the leakage of confidential information

### Network Security and Access Control

- **S/MIME** provides secure e-mail communications\*  
\* Only when e-mailing scanned data.
- **SSL** (secure sockets layer) and **IPsec** data encryption technologies ensure secure network communications
- **User Authentication** covering up to 1,000 users prevents unauthorised MFP use by requiring access passwords

# EASE OF USE

## 10.1-Inch Colour LCD Touchscreen

A user-friendly touchscreen interface incorporating a new Easy UI mode makes it easy and intuitive to operate the MFP. The Advanced Preview function, meanwhile, lets you check document finishes and page layout in advance, edit pages easily, and preview documents in various modes.

Preview mode (3D)

Edit mode (rotate)

## Accessibility

These MFPs comply with the accessibility guidelines outlined in US Section 508 and EU Mandate 376. This means that all user aspects—from the heights of the control panel and glass platen to the readability of the LCD—have been designed with consideration for usability by people with disabilities.

## Utility Table

An optional Utility Table gives you a handy place to lay documents or a mobile device such as a tablet when you're working at the MFP. An IC card reader\* can be built underneath the table.

\* Commercially available

## Lock-on Handles

The paper drawers on these MFPs feature easy-grip, lock-on handles. As well as enabling easy opening and closing, they ensure that the paper drawers close properly, thereby enhancing safety in the event of a disaster such as an earthquake.

## LED Status Lamps

Next to the control panel are two LED lamps: one red, one green. These light up to notify you—even from a distance—of the status of the machine.

### 3 LED lamp modes

Job status mode

Machine status mode

Accessibility mode\*

\* Indicates whether documents have been properly set in the document feeder

## Free-Tilting Control Panel

The control panel can be tilted freely at various angles for easy viewing and easy operation, even from a wheelchair. Having the control panel at the perfect viewing angle means you can reduce eye strain and avoid making input errors.

## Remote Operation\*

The Remote Operation function lets you display the MFP's main control panel on the screen of your PC or mobile device. From a remote location, you can then check MFP settings or reprint data stored on the MFP. This function also enables the administrator to guide an MFP user through necessary procedures and allows remote MFP operation from a wheelchair.

\* Requires VNC application. Simultaneous remote operation from two or more PCs or mobile devices is not possible. Remote operation also depends on the network environment and applications being used. Contact a Sharp customer representative for details.

## Direct Printing\*/Scanning with USB Drives

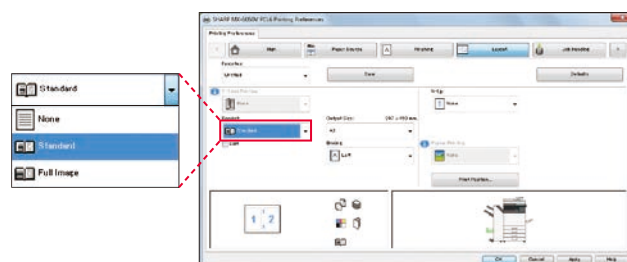

Insert a USB drive into the MFP and a print/scan command screen will automatically pop up on the LCD. Right away you can print files from the USB drive—which are displayed as thumbnails—or you can scan documents directly to the USB drive.

\* Direct printing of PDF files requires optional MX-PK13; direct printing of Microsoft Office (pptx, xlsx, docx) files requires optional MX-PU10.

## Printer Driver with Easy Setup

The printer driver setup window features a simple design that includes larger buttons and drop-down menus, making it easier than ever to use printer functions.

## Easy, High-Quality Copying and Scanning

Through an advanced three-step process, **Auto Colour Mode** provides fully automated copying and scanning in both colour and B/W—with a simple press of the Start button. Here's how it works: **Auto Colour Selection** automatically determines whether a page is colour or B/W. **Auto Original Type Selection** then analyses page contents to distinguish between different components (such as photos and text) and selects the appropriate mode. Finally, **Background Suppression** automatically removes unnecessary background colour.

### Auto Colour Mode

## Developer Refresh System

By discharging old developer little by little and continuously replacing it with new developer, this system prevents developer deterioration and ensures stable print quality over the long term.

## PCL 6 and True Adobe® PostScript® 3™

For better graphics handling, these MFPs support both PCL 6 and Adobe PostScript 3\*. In addition, the PostScript driver allows you to use the dot screening technique so that you can emulate the high-quality printing of commercial offset printers.

\* PostScript printing requires optional MX-PK13.

## Crisp, Clear Text and Images

Each MFP's print engine support 1,200 x 1,200 dpi printing and copying\*. Digital smoothing technology delivers print and copy resolution at the equivalent of 9,600 x 600 dpi, giving you ultra-clear image quality. Fine lines and small text come out looking crisper and easier to read.

\* Copying in B/W only.

## Wide Colour Gamut

By thoroughly revamping the imaging process, Sharp was able to expand the colour gamut for these MFPs. As a result, colour reproduction is more faithful and vivid\*.

\* Compared to Sharp's previous models (MX-5140N/4140N).

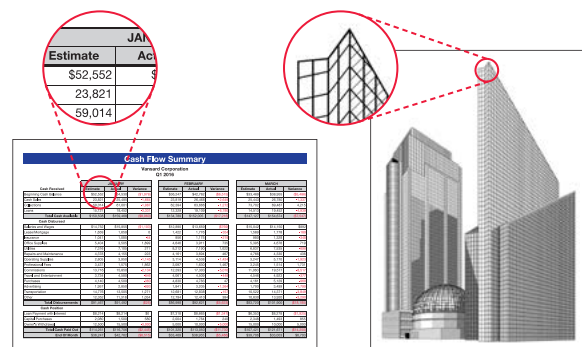

## Auto Process Control

To maintain consistently high image quality during large-volume print jobs, these MFPs employ a periodic colour calibration system. Image density sensors read high-density and halftone colour patches and feed the information back to the image control unit. The MFP can then make adjustments to minimise colour variance between pages.

## Line Width Adjustment

This function adjusts the width of lines. Fine lines, which are otherwise difficult to render properly, turn out sharp and crisp. Intricate line drawings, complex graphs and charts, and detailed spreadsheets are reproduced with exceptional quality and precision.

# ENVIRONMENT-FRIENDLY

## Low TEC Value\*1

In every respect, these MFPs have been designed to deliver exceptional energy efficiency. As a result, they boast a TEC value that is significantly lower than the maximum allowable values determined by ENERGY STAR®.

\*1: Typical amount of energy consumed in a hypothetical week measured as stipulated under the ENERGY STAR programme.

\*2: Maximum TEC value allowable under the latest ENERGY STAR programme (version 2.0).

\*3: Measured at 230 V.

## Eco Recommendation

This function suggests environmentally friendly settings before a print\*/copy command is executed from the control panel.

\* For printing Document Filing data and direct printing (FTP/SMB/USB)

## Eco Scan

The Eco Scan function saves energy by keeping the fusing system shut down during jobs that don't require its use—for example, during image sending and Document Filing.

## Auto Power Shut-Off Mode

Based on prior usage patterns, the MFP automatically determines how long to wait before going into auto power shut-off mode. Shortly before this mode begins, a message appears on the LCD indicating that the MFP will soon shut down and giving you the option to continue operation.

## Power ON/OFF Schedule

This function automatically turns the MFP on or off per administrator-set schedules.

## Eco-Friendly Toner

Mycrotoner-Crystal is filled with low-melting-point material. This toner is able to fuse at low temperatures, resulting in reduced energy consumption.

## Automatic Toner Cartridge Eject Function

This function expels completely empty cartridges in preparation for replacement. The cartridge is replaced only after all the toner has been consumed, thereby ensuring efficient use of toner. Because you can tell at a glance when cartridges are empty, they are fast and easy to replace.
